STICHED TOGETHER LIGHTENED/BRIGHTENED FRAMES

Closely mimics Mathematica's frameLighten
algorithm with:

- 1. Binarize[img, val]
- 2. ColorNegate
- 3. ImageAdjust[img, {0, adj}] => multiply by adj,
clip to [0..1]
- 4. Compose brightened image onto original where
mask == 1

Details to pay attention to

UPDATE: The Fairfield CT Reservoir Plasmoid

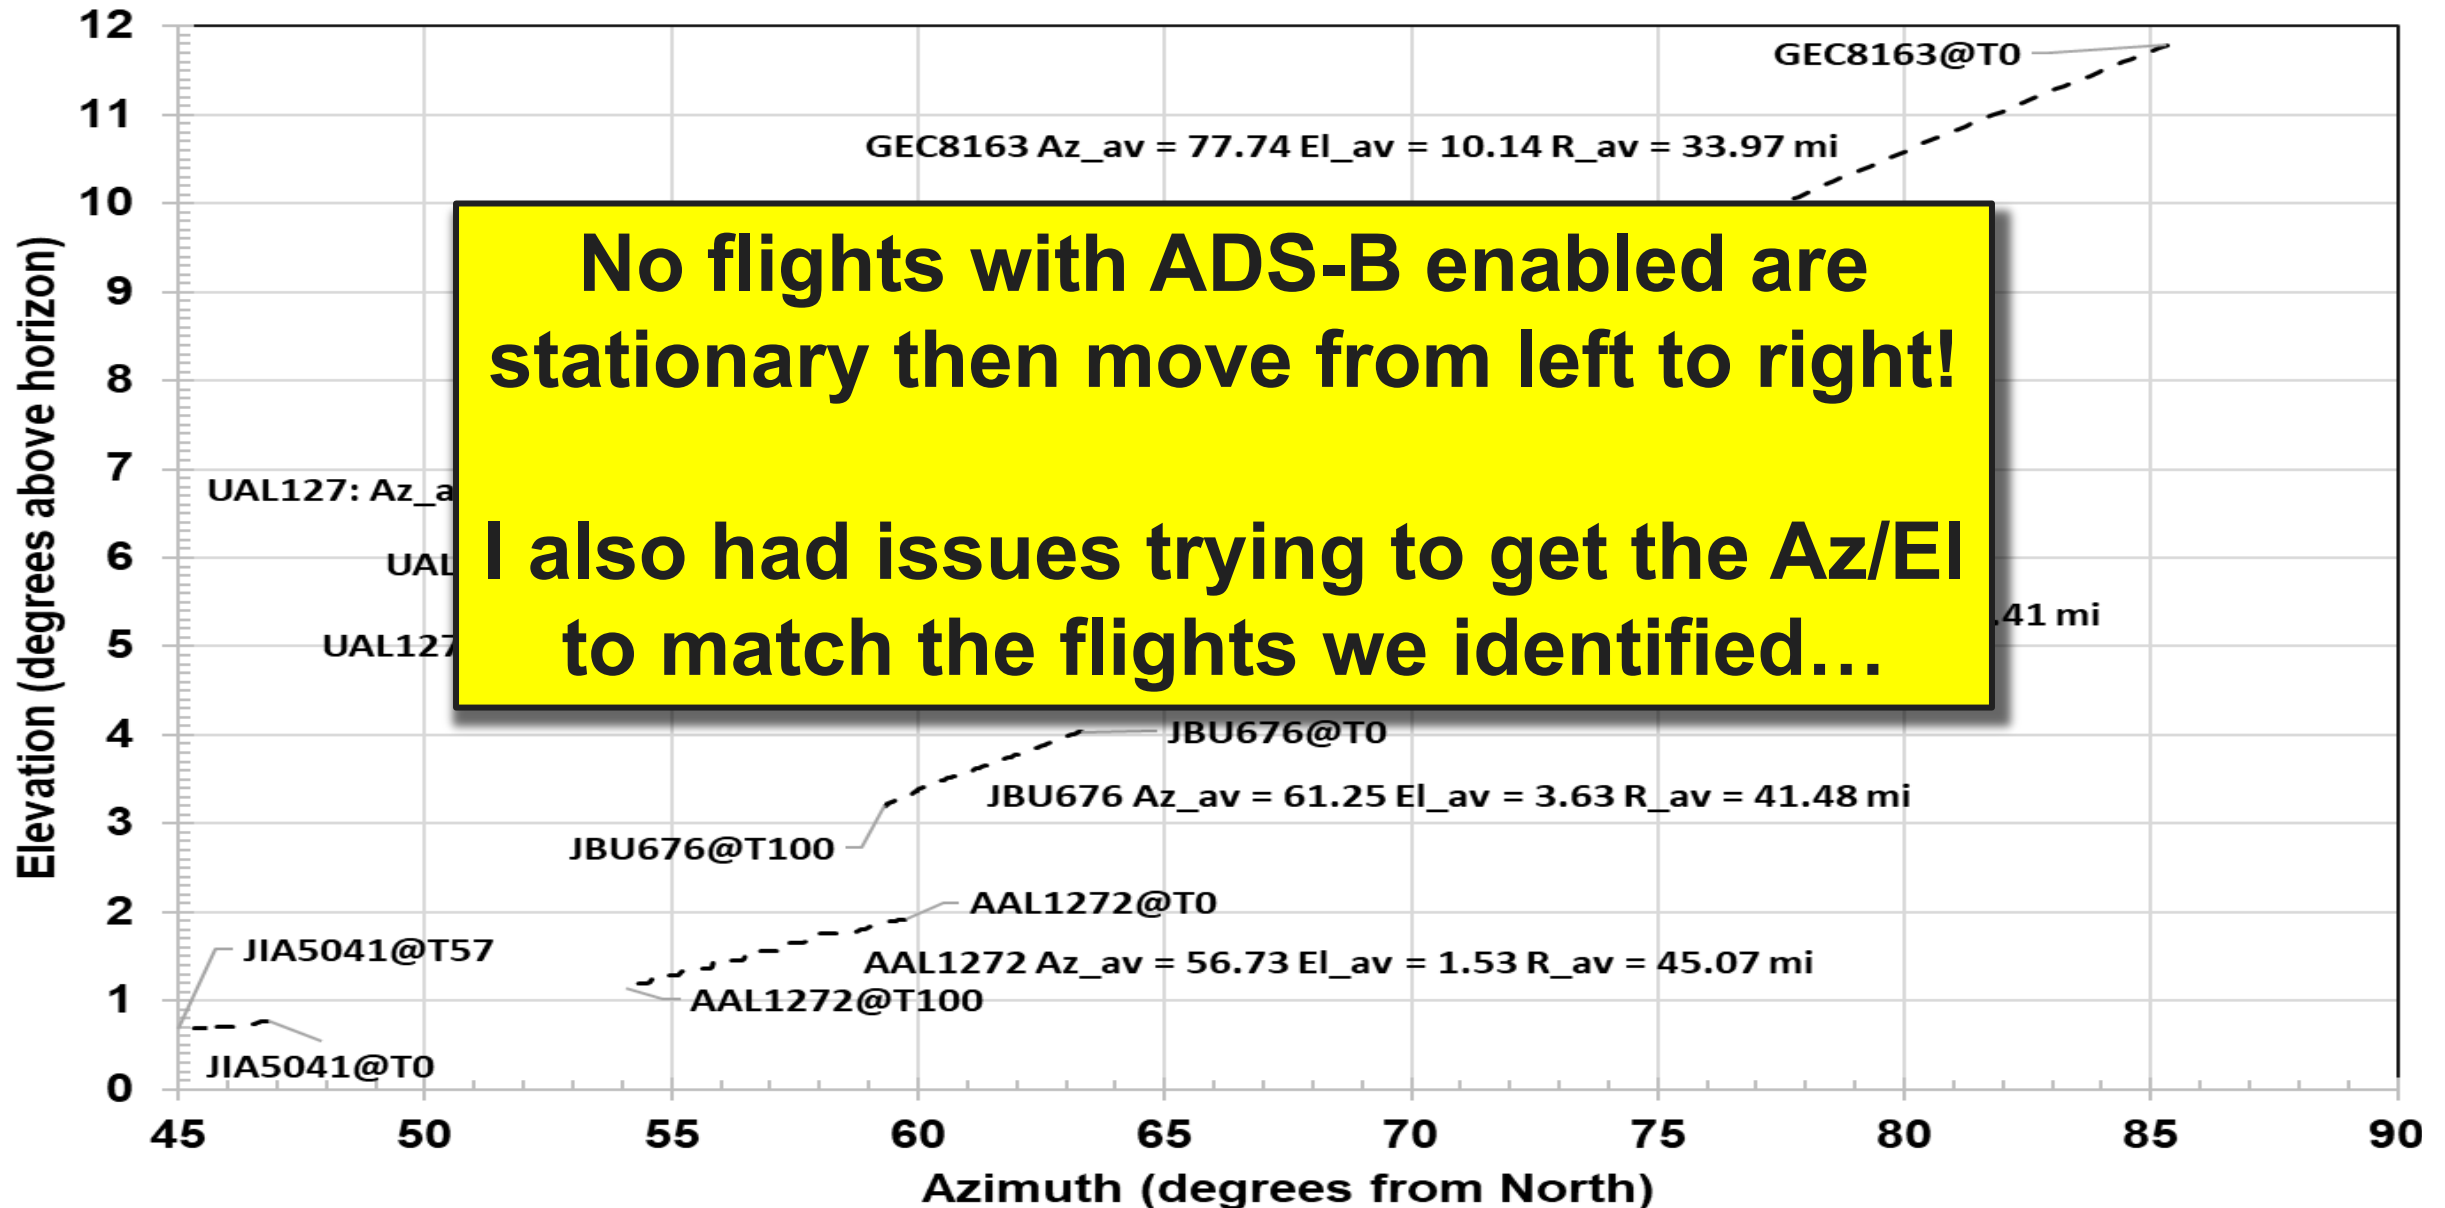

We believed that this was the angle Officer Klein was viewing. Assumption was “Red” Maple trees grew in the ensuing ~2 years and branches fell off etc.

A key detail that we MISSED!

Officer Klein pointing us in the direction he recalled looking

Possible Flights in Officer Klein's Video – From this Angle

UPDATE: The Fairfield CT Reservoir Plasmoid

Dr. Buettner was contacted by “flarkey” that further to the south was a flight that actually did turn to the “right” (further south)... and that there were some trees further to the south of where Officer Klein thought he was that night. He apparently used Google’s road driving feature and found trees that appeared to match those seen in the video. Thanked him for the observation and started looking into his finding...

Flights were retrieved by one of us and me also appear to match the additional flights seen in the video.

Flarkey also provided us with their ADS-B exchange website to pull older data from. This additional data...

UPDATE: The Fairfield CT Reservoir Plasmoid

Ben K. walked it with a friend of his who captured images/video from this angle.

Asked Ben Kugielsky (UAPx) to scope out the location further up the road reported by “flarkey” and take video/photos for us.

UPDATE: The Fairfield CT Reservoir Plasmoid

GPS location obtained with Ben K
showing Dr. Doug the location on Google
Earth PRO.

Note the angle of 92° E.

**I pulled the images out of his photos.
Then I wrote a Python script to allow me to manually
overlap Officer Klein's video on these images.**

UPDATE: The Fairfield CT Reservoir Plasmoid

klein – lightened frame2309.png TX=1134 TY=370 SCALE=0.242637 ALPHA=0.820 PEARSON=0.319062

Overlaying results...

These coefficients are “very”
telling that this was in fact
where he took the video from **21**

My attempt to get the tilt correct in Google Earth (for this view angle) so you can see the flight is visible coming at Officer Klein before it heads south, off to the right.

KLEIN-Orig Grnd Zero ↓

📌 **New Grnd Zero**

Valley Forge Rd

56 m

Image © 2025 Airbus
Data SIO, NOAA, U.S. Navy, NGA, GEBCO
Image Landsat / Copernicus

Heading is ~116° a ~2° difference from GPS calculations.
AND a ~24° difference from Ben K's phone. In a follow-up, he revisited the site (next few charts) with a surveyor's compass to check the phone's values.

Ben K. was able to confirm that the ~24° difference is from the phone (apparently) not updating the angle when he walked around.

UPDATE: The Fairfield CT Reservoir Plasmoid: Revisiting the 92° look angle with a physical compass

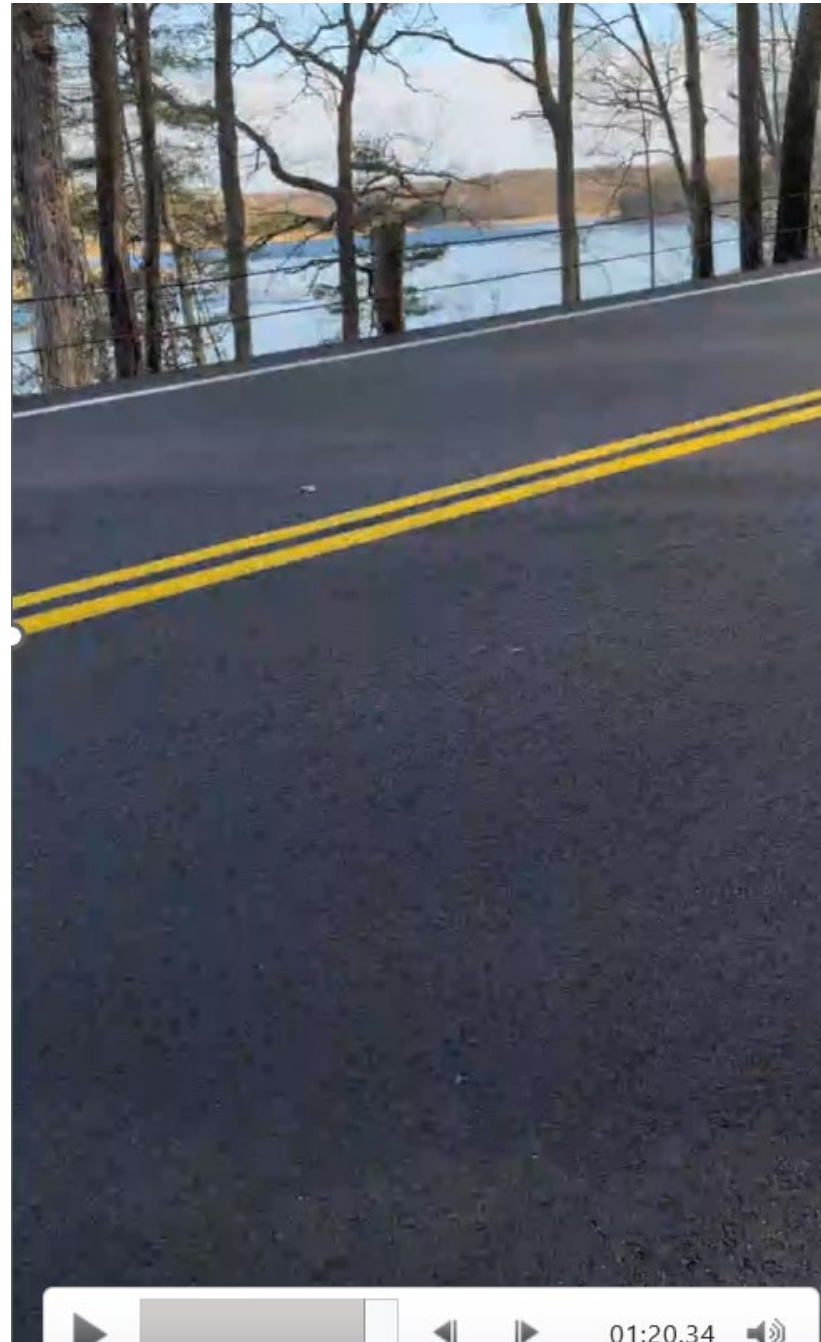

Ben Kugielsky revisited the location with a surveyor's compass

SUUNTO A-10 Compass

UPDATE: The Fairfield CT Reservoir Plasmoid: Revisiting the 92° look angle with a physical compass

Ben K. from UAPx cross checked the alternative “ground zero” using a surveyor’s compass near where the trees better matched Officer Klein’s video as his other video showed a significant look angle discrepancy.

Conclusion @ >90% certainty

Our hats off to flarkey, with our thanks!

That Officer Klein captured landing lights from Jet Blue (JBU1168) flying from Bermuda into the Westchester County Airport.

Final Comments about the Saugatuck Reservoir Case

- While some may consider this case closed, we do not.
- It was more than a year after Officer Klein's sighting that we interviewed him.
 - We are going to chalk it up to the problem of interviewing the witness after the fog of time has set in. Suggesting that these cases need to be investigated soon after they happen!
- Although the evidence now clearly suggests that the video is of JBU1168, there is more evidence that we are still investigating:
 - Ms. Maksel's eyewitness account of a similar phenomena, but behaving in a manner that it could NOT be an aircraft
 - We have additional video of something "interesting", and yes, we checked the ADS-B but nothing checks out
- Is it possible that many of the local "UAPs" are aircraft, yes, but we do not yet believe they all are.
- We feel more evidence is needed...

A FINAL NOTE

- This presentation was originally created for the 2026 SCU Conference, however, our abstract unfortunately did not make the cut.
- Hence, we are publishing this on Dr. Buettner's GitHub site to provide open communication about the status of this UAP investigation.
- This is NOT our final word on this case.
- Stay tuned here as we continue to analyze data from our excursions to this location, can plan further excursions with better equipment.
